

# Pace Offroad Wiring Harness

## Accessories Outputs

Accy	Amps	Color	Power Source	Possible Accys
Accy 1	20	Red	Key on / Relay	LED Light Bar
Accy 2	20	Blu	Key on / Relay	Rock Lights, etc.
Accy 3		Ylw/Blk	Battery / Fused	Dome, Whips, etc.
Accy 4		Org/Brn	Battery / Fused	Whips, Dome, etc.
Accy 5	30	Grn/Blk	Battery / Fused	Radio, etc.

NOTES: The Accy plugs are designed for use with Carling Tech 4 wire switches. Accessories 3, 4, & 5 are fused together for a total amp load of 30 amps combined. Accy 5 wire at "Accy Outputs" is hot all the time and is not switched through the harness.

Wiring harness includes prewired "Accy Output" pig tails, which will have to be wired to the appropriate accessory.

Special care should be taken to insure the engine, battery and harness are grounded to the chassis. Some whip and dome lights are grounded to the frame requiring only a power wire.
